

Dear Families,

The information contained in this report card is a collection of data for all schools and districts across the state of Oklahoma. The test scores listed on the reports card are from one year ago during the 2009-2010 school year. The information compares Cherokee Elementary with other schools in our state.

As you can see, Cherokee 3<sup>rd</sup> graders scored above the state average in both math and reading. Our 4<sup>th</sup> graders scored below the state average in both math and reading. Students and staff members have worked hard to improve these scores this year.

You can also see other data about our school district and how we compare to state averages.

This information is provided to keep you informed of our school's overall performance. We firmly believe that the strong relationships we build with our students and their families will help each child reach their full potential. We cannot adequately express the importance of your involvement and participation in your child's education. Please remain active in your child's school experience. The time spent with them in school will help ensure their future success.

Thank you for helping make our school successful. As always, we encourage you to call or come by the school if you have any comments, questions or concerns.

Sincerely,

Kair Ridenhour  
Cherokee Elementary Principal
